**6 new 6.000 tpd Pendulum Coolers® shipped to Egypt**

In March 2017, 60 containers were shipped to Egypt making this the largest single shipment ever in the history of IKN. Only 9 months before, IKN was awarded a contract for the supply of six new 6.000 tpd IKN Pendulum Coolers® for the Government of Egypt as part of the new lines which are being supplied by Chengdu Design & Research Institute of Building Materials Industry.

Frank Lichomski, Director Sales: “This order is especially important for us because it proves the superior concept of IKN’s clinker cooling technology. The customer operates four similar lines at a different location with coolers based on “walking floor technology”, but for this important project the IKN Pendulum Cooler® was selected because of its lower electrical power consumption, high efficiency and trouble-free operation”.

Installation and commissioning of the coolers is scheduled for the third quarter of 2017, and finalization of the whole plant is expected by the end of the year.
