**IKN's latest turnkey cooler revamping project in Texas, USA**

In December 2016, Martin Marietta Materials signed a contract with IKN for replacement of the existing clinker cooler in line #5 at their Midlothian plant in Texas, USA.

The scope of the project includes the supply of a complete new IKN Pendulum Cooler® with a capacity of up to 8.500 stpd. The new cooler is equipped with an IKN Roll Crusher in the intermediate position. Modification of the kiln hood and a new kiln outlet seal are also part of the scope. The contract has been signed on an EPC basis and includes all related electrical, civil and mechanical installation supply and erection work. Sourcing and installation of the refractory will also be under the responsibility of IKN.

Final installation of the project is planned for the first quarter of 2018 and is scheduled for 35 days flame-to-flame.
