#### OYAK CEMENT ORDERS LATEST GENERATION IKN PENDULUM COOLER FOR ÜNYE

During the 16th TurkCimento which was held in October 2022 in Antalya, Turkey, OYAK Cement and IKN GmbH signed a contract for a new 5.000 tpd IKN Pendulum Cooler for the OYAK plant in Ünye, Turkey.

The latest generation IKN Pendulum Cooler was chosen because of its environmentally friendly Dynamic Linear Drive and the new Coanda Wing Technology resulting in the lowest electrical power consumption in the market. Without any active components, grease or oil inside the cooler housing, the cooler reduces maintenance and operation costs.

Both parties agree that this contract represents a major step towards the green cement technology in Turkey.

#### About OYAK Cement:

Maintaining its activities at 6 plants and its sales operations in 7 geographical territories as the capacity and market leader of Turkish Cement Industry, OYAK Cement is a leading community playing an efficient role in the national market, developing areas of cement use with the principles of efficiency, creativity, and profit-orientation.

#### About IKN GmbH:

IKN is a family-owned engineering company with headquarters located near Hanover, Germany. The core product of IKN, the IKN Pendulum Cooler, has been installed in over 400 cement plants worldwide. In addition, IKN engineers, supplies, and installs highly efficient pyro lines designed for up to 100% utilization of alternative fuels helping to reduce the plants CO<sub>2</sub> footprint day by day. Latest reference is the new 3.000 tpd pyro line of Märker Zement in Harburg, Germany.
